PROJECTS

DAPSAKA (Decentralized Lightweight IoT Authentication Protocol)

– Designed and developed a decentralized IoT authentication protocol with a web-based monitoring dashboard, enabling secure device authentication, encrypted communication, and real-time sensor data monitoring.

AI-Based Real-Time Traffic Flow Optimizer – Developed an AI-based traffic management system using ESP32, AWS Rekognition, AWS Lambda, and AWS IoT Core to optimize traffic signal timings based on real-time vehicle detection, improving traffic flow and reducing congestion.

SKILLS

Technical Skills:

- Python , C ,Java
- Cyber Security, Machine Learning
- Data Science

Soft Skills:

- Strong Logical Thinking Skills
- Time Management, Team work
- Problem Solving

CERTIFICATIONS

- Data Science For Engineers - NPTEL
- TCS iON Career Edge – Young Professional
- Generative AI Foundations - AWS Academy
